

## AVERO Motion E

Unique Height adjustable Reclining bath  
with practical hand control

Promote the mobility and independence of residents with the designer care bathtub AVERO Motion E.

A safe entry is guaranteed by the low entry height.

Partially mobile residents in particular appreciate a relatively independent entry into the care bathtub.

A unique bathing experience for your residents!

Soft shapes, a large amount of space and the ergonomic tub body guarantee a comfortable bathing experience for your residents.

The AVERO Motion E is operated via the practical cable remote control with intuitive symbols.

Group 1    Group 2    Group 3    Group 4\*

\* only in combination with a transfer hoist

Sitting position of the tub is ideal for showering your residents

No edges in the door area for unimpeded transfer with the wheelchair

Freely accessible base frame suitable for all modern patient lifts

Large space in the tub body

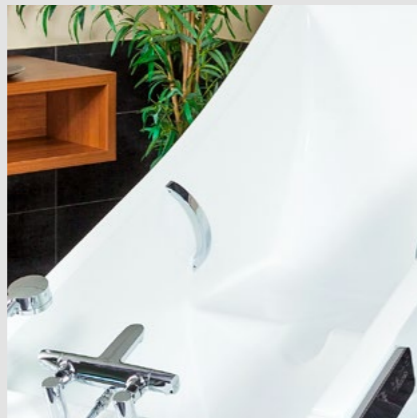

Allows a clear view of the room without a bulky control panel

Large foot area with a pre-filling volume of 98 liters

Cable remote control with intuitive symbols for easy operation

Ergonomic handles provide bathers with optimal support and safety

Special back profile prevents slipping in the tub body

## Elegant design with tilt function

Soft shapes characterize the appearance of the AVERO Motion E. In the sitting position, the tub can be used to shower residents without any problems. The tilt function gently brings residents into the bathing position. Thanks to the large pre-filling volume of 98 l in the foot area of the tub, the residents immediately lie in the warm bath water when the tub tilts back!

## High bathing comfort for every type of resident

The AVERO Motion E offers enough space for tall and heavy residents allowing for a pleasant bathing experience regardless of body size and weight.

## Simple, safe self-entry possible

The large side opening door of the AVERO Motion E enables residents to enter into the bathtub independently. This promotes mobility and gives partially mobile residents a dignified feeling of independence. The low entry height is also ideal for wheelchair transfers.

## Freely accessible base frame

The AVERO Motion E can be freely accessed with all modern bath and patient lifts.
