BEKA Hospitec GmbH is manufacturer of
technical aids for care facilities.

With our over 50 years of experience we support planners,
architects and decision makers in the procurement of care
and therapy products.

Bathing and showering

Cleanliness and hygiene are an elementary aspect of daily care. In particular, bathing can significantly increase the well-being of residents through its wellness character.

AVERO Motion

Designed by Uwe Spannagel™

- ✓ Seat- and reclining tub
- ✓ Easy and safe self-entrance possible
- ✓ Extraordinary design
- ✓ Base frame is accessible from all sides
- ✓ Maximum space in shoulder and seat area

Modern seat- and reclining bath tub. Clear and soft lines determine the tub design of the AVERO Motion.

Large inside dimensions as well as the ergonomic back profile offer plenty of space and maximum bathing comfort.

While bathing or showering the resident can enjoy a full view into the room without distracting operation panel.

Beautiful bathing experience.

Watch product video!

- ✓ Design seat- and reclining tub
- ✓ Specially shaped seat with care opening
- ✓ Base frame is accessible from all sides
- ✓ Easy and safe self-entrance possible
- ✓ Maximum space in shoulder and seat area

Unique tub design.

Modern seat- and reclining bath tub. Improve the mobility and independence of your residents with the design care bathtub AVERO Motion E. A safe self-entry is ensured by the low entrance height of the tub. While bathing or showering the resident can enjoy a full view into the room without distracting operation panel.

AVERO Motion E

Designed by Uwe Spannagel™

AVERO Phoenix

Designed by Uwe Spannagel™

High-quality materials.

Watch product video!

- ✓ Base frame is accessible from three sides
- ✓ Simple operation via membrane keypad
- ✓ Ergonomic tub interior body
- ✓ Ergonomically lowered leg section
- ✓ Specially adapted back profile

Exclusive lifting tub. The AVERO Phoenix offers high-quality materials and a unique design with not only a distinctive look but also excellent support and a feeling of safety for the resident who can enjoy the bath in complete relaxation.

Comfortable lifting tub. The AVERO Premium plus meets all the demands of longterm and special care. Bathers appreciate the comfort that results from the ergonomic tub and the large space available.

Functionality and design combined.

AVERO Premium plus

Watch product video!

- ✓ Base frame is accessible from three sides
- ✓ Ergonomic tub interior body
- ✓ Ergonomically lowered leg section
- ✓ More than sufficient space for the resident's shoulders

AVERO Comfort

Designed by Uwe Spannagel™

Homely character
supports wellbeing.

- ✓ Modern, elegant tub shape
- ✓ Change of viewing direction
- ✓ Ergonomic tub interior body
- ✓ Simple, timeless tub design
- ✓ Optional thermal disinfection

Watch product
video!

Lifting tub with homely character. The timeless tub shape fits unobtrusively in your new nursing bathroom and at the same time gives your residents, your staff and visitors the impression of a domestic surrounding. The tub can be rotated and placed in the room in such a way that the resident can look freely around the room while bathing.

Lifting tub with timeless design. The simple exterior paneling and high quality materials give the AVERO VIVA a timeless look.

Thanks to the ergonomic tub body and the very large space available, residents enjoy a comfortable and relaxing full bath.

The tub is freely accessible and can be used in confined spaces with all modern care hoists.

Classic and elegant look.

AVERO VIVA

- ✓ Simple, timeless tub design
- ✓ Ergonomic tub interior body
- ✓ Simple operation via membrane keypad
- ✓ Optional thermal disinfection

COMPACT series

COMPACT

Fixed height tub with integrated transfer seat

COMPACT plus

Lifting tub with integrated transfer seat

COMPACT solo

Lifting tub

Seamless transition
from transfer to bathing.

- ✓ Integrated transfer seat (COMPACT, COMPACT plus)
- ✓ Transfer seat either detachable or permanently (COMPACT, COMPACT plus)
- ✓ Different tub lengths available (1.600 mm or 1.700 mm)
- ✓ Optional: Chassis for detachable transfer seat (COMPACT, COMPACT plus)

Compact care tub in practical versions. The body of the COMPACT series impresses with its ergonomic inner profile and comparatively small footprint. Thanks to the transfer chair (COMPACT and COMPACT plus), the use of an additional lift is redundant.

INVITA

Practical tilting tub for showering and bathing. The INVITA sitting and showering bathtub offers a unique concept to combine bathing and safe showering. It enhances the independence of the resident and preserves his dignity due to the possibility of self-entry into the tub. Of course, patient lifts can also be used for transfer into the tub.

Watch product video!

- ✓ Ideal for small room concepts
- ✓ Absolutely safe sitting and bathing positions, without sliding risk
- ✓ Safe shower solution with bathing option
- ✓ Safe entry is supported by handles mounted on sides of the tub rim

Unique combination of showering and bathing.

Accessories and options for our care baths

Aroma system

The aroma system allows to enjoy a sensory experience while bathing. Only possible in combination with air-whirl system.

Colored-light system

Pleasant light experience for the bather. Multiple colors and automatic color change possible.

Air-whirl system

Invigorating massage effect that promotes blood circulation and enhances the overall wellbeing of the bather.

Music-sound system

Integrated speakers that transform the music into water vibrations. Audio input via USB.

Bluetooth-music-sound system

Enjoy music while bathing through the built-in speakers by connecting your bluetooth enabled device.

Bathtub shortener

Stable support in the tub - even for smaller residents. Easy to insert into the tub body.

Disinfection system

System with integrated disinfection hand shower to protect against infections. Protection against incorrect operation.

Automatic tub filling

You can set the filling level as you wish so that you can select the right amount of water adapted to the resident and the application.

Change of viewing direction

The tub can be rotated and placed in the room in such a way that the resident can look freely into the room while bathing.

Emergency function in case of power failure

A built-in battery provides power to the control unit even in the event of a power failure, so the up-down function is always guaranteed.

Special color according to RAL

The color of the tub body can be chosen freely according to RAL and your taste.

EVE!

Designed by Uwe Spannagel™

Shower and bath lift. The seat lifter EVE! is a true all-rounder. The bath lift reliably handles transfer tasks in the bathroom - in addition, EVE! can be used completely as a shower chair. The simple handling by only one caregiver, high-quality materials and the appealing design characterize the EVE!.

- ✓ Fits in every modern care bathtub
- ✓ 100% usable as a shower chair
- ✓ Modern, contemporary design
- ✓ Low entry height
- ✓ Ergonomic safety handles for precise manoeuvres

Design shower and bath lift.

- ✓ Modern, contemporary design
- ✓ Wide, comfortable lying area
- ✓ 100% usable as a shower stretcher
- ✓ Removable PUR cover
- ✓ Low transfer height of just 48 cm
- ✓ Electrically adjustable backrest

High quality.

ADAM!

Designed by Uwe Spannagel™

Modern stretcher type lift. Safe, comfortable and modern – ADAM! can be used as a classic bath lifter as well as a shower stretcher. With its low transfer height, the wide and comfortable lying surface and the electrically adjustable backrest, ADAM! is the perfect combination of maximum functionality and unique design.

SENTA PUR L

Flexible shower and bath lift. The SENTA PUR L is a reliable tool for caregivers to comfortably shower or bathe residents. The bath lifter is also suitable for taking over patients with appropriate mobility from the bed. In just a few steps, the SENTA PUR L becomes a full-fledged stretcher type lift.

Easily expandable
to a stretcher type lift.

- ✓ Easy and flexible to operate
- ✓ Optional with stretcher type modules
- ✓ Stepless height adjustment
- ✓ Fits in every modern care bathtub
- ✓ Seat with large care opening

Watch product
video!

SINA Comfort

- ✓ Made of stainless steel
- ✓ Safe and comfortable showering
- ✓ Negative and positive steplessly adjustable
- ✓ Applicable for a shock position
- ✓ Space saving, suitable for every care bath

Also available as
XXL version (up to 250 kg).

Universal shower trolley. The SINA Comfort offers the perfect opportunity to safely and comfortably shower people who can no longer be transferred with conventional bath and shower lifts due to their extremely limited mobility.

Pleasant padding and high side rails ensure high comfort and safety. Optionally available with electric or hydraulic height adjustment. Optionally available with electric or hydraulic height adjustment.

Watch product
video!

Optimal supplement for mobile shower systems. The BEKA Hospitec shower panel can be perfectly combined with shower trolleys, shower and bath lifts as well as shower and care chairs. By using the optional disinfection device, shower systems can be effectively, easily and safely disinfected. Available in versions with and without WC.

Optionally available
with WC.

Shower panel

- ✓ Shower panel for wall mounting
- ✓ Universally applicable, also with WC solution
- ✓ Easy installation on water connection
- ✓ No power supply necessary
- ✓ Low space requirements

Transfer solutions

Transfer procedures require reliable technical aids. Our active and passive lifters support caregivers and residents in safe lifting, transfer and mobilization.

NORA Alu

Flexible active lift. Our NORA Alu is the ideal stand-up aid, even for smaller residents with a height of up to 1.60 m. Additional mounting bolts for the belt suspension and the height-adjustable double knee pads allow individual adjustment to the height of the body and thus a painless transfer process for residents, regardless of body size.

- ✓ Aluminum construction
- ✓ Electrically spreadable carrier frame
- ✓ Suitable for small residents
- ✓ Ergonomic lifting
- ✓ Comfortable, flexible knee pads

Made of high quality aluminum.

NORA ECO

- ✓ Easy to manoeuvre
- ✓ Flexible, soft knee pads with safety harness
- ✓ Ergonomic lifting
- ✓ Can be operated by only one caregiver

Improves the mobility
of your residents.

Easy-to-use stand-up aid. The NORA ECO stand-up aid effectively relieves nursing staff when transferring semi-mobile residents. The active lift can be easily operated by just one caregiver. The belt and ergonomic concept, together with the double knee padding, guarantees flexible and comfortable transfer processes.

CARLO Alu, Comfort EP 185

Effective relief in daily care.

Flexible sling hoist made of lightweight aluminum. The CARLO Alu, Comfort EP is universally applicable as a reliable sling hoist for lifting and relocating residents, but also for bathing and showering them. Thanks to innovative elements such as the electric positioning system (EPS) and the anti-rotation mechanism (ARM), residents can be precisely positioned without any effort and without causing the spreader bar to vibrate and produce unpleasant oscillations.

Watch product video!

- ✓ Aluminum construction
- ✓ Extra light and easy to move
- ✓ Anti-rotation mechanism (ARM) prevents rotation of the spreader bar
- ✓ Electrical positioning system (EPS)
- ✓ Suitable for bathing and showering
- ✓ Other variants with lower chassis available

CARLO Alu, Comfort EP 230

For heavyweight residents.

Sling hoist for heavyweight residents. The CARLO Alu, Comfort EP 230 masters the transfer of occupants with a weight of up to 230 kg. The Electric Positioning System (EPS) and Anti-Rotation Mechanism (ARM) ensure the highest precision in placing heavy occupants without causing the spreader bar to vibrate and cause unpleasant rotation during transfer.

Watch product video!

- ✓ Aluminum / steel construction
- ✓ SWL up to 230 kg
- ✓ Anti-rotation mechanism (ARM) prevents rotation of the spreader bar
- ✓ Electronic positioning system (EPS)
- ✓ Electric height adjustment and electrically expandable chassis

CARLO ECO, Comfort EP

Convenient sling hoist.

Patient lift for clip slings. The CARLO ECO, Comfort EP sling hoist is electrically adjustable between sitting and reclining positions. Its balance spreader bar (pivot range of 360°) with anti-rotation mechanism ARM (patent pending) guarantees a pleasant feeling during transportation. Chassis and lifting column made of aluminum/steel construction. Electric height adjustment (with emergency lowering) and chassis spreading are controllable via a cable remote control with visual indicators for fault, maintenance and battery charging status.

- ✓ Aluminum / steel construction
- ✓ Anti-rotation mechanism (ARM) prevents rotation of the spreader bar
- ✓ Electronic positioning system (EPS)
- ✓ Electric height adjustment and electrically expandable chassis
- ✓ Available as 185 (capacity 185 kg) or 205 model (capacity 205 kg)

Lightweight passive lift made of high quality aluminum. The CARLO Alu, Classic 185 offers your residents a maximum of comfort and security when being transferred. The spreader bar can be lowered to the ground and safely lifts fallen inhabitants off the ground. Due to the anti-rotation mechanism (ARM) residents do not get into uncomfortable rotation during the transfer. No manual lifting by the caregiver required.

Watch product video!

- ✓ Lightweight construction
- ✓ Anti-rotation mechanism (ARM) prevents rotation of the spreader bar
- ✓ Easy and flexible to operate
- ✓ Suitable for bathing and showering
- ✓ Hand control with display of the battery status

CARLO Alu, Classic 185

Reliable patient lift.

Sturdy passive lift made of aluminum-steel construction. The CARLO Alu, Classic 230 lifts and transports even heavyweight residents weighing up to 230 kg safely and comfortably. During the transfer residents do not get into pendulum movements thanks to the anti-rotation mechanism. A large amount of space between the spreader bar and lifting column ensures a pleasant feeling during transfer.

Watch product video!

- ✓ Lightweight and stable aluminum / steel construction
- ✓ Easy and flexible to operate
- ✓ Anti-rotation mechanism (ARM) prevents rotation of the spreader bar
- ✓ Large space inside the spreader bar

CARLO Alu, Classic 230

For heavyweight residents.

Passive lift made of aluminum-steel construction. The CARLO ECO, Classic has a 2-point-spreader bar for slings with loops. Its chassis is electrically height adjustable and spreadable via a cable remote control, that furthermore contains visual indicators like fault, maintenance and battery charging status. The spreader bar offers anti-rotation mechanism (ARM) and therefore guarantees a safe and easy transfer of the patient with no unpleasant movements.

- ✓ Compact dimensions
- ✓ Available as 185 (capacity 185 kg) or 205 model (capacity 205 kg)
- ✓ Lightweight and stable aluminum / steel construction
- ✓ Anti-rotation mechanism (ARM) prevents rotation of the spreader bar

CARLO ECO, Classic

Functional sling hoist.

CARLO Air

Innovative ceiling hoist system. The CARLO Air impresses with its unique rail system, which can be adapted to almost any room layout. Limited space with narrow curves are not a problem due to the space-saving system. Since the ceiling lift automatically recharges when not in use, the CARLO Air is almost always ready for use. With a capacity of 200 kg (400 kg optional), CARLO Air meets the highest demands.

One rail system
(rail can also be bent)

Variety of
rail systems

Possibility of using it in two
or more rooms

Two rails for greater flexibility
(traverse system)

Individual adaptability,
to almost every room layout.

- ✓ Back-friendly transfer
- ✓ Hand control unit with all functions
- ✓ Emergency lowering
- ✓ Integrated diagnostic system with error display

Pool Lifter

- ✓ High quality stainless steel construction
- ✓ Custom-made
- ✓ 360 ° plain bearing with locking points
- ✓ Quick coupling for receiving the bath seat
- ✓ Electric height adjustment by battery

Reliable,
flexible.

Fixed, rotatable pool lift. The BEKA Hospitec Pool Lifter handles lifting operations safely and effortlessly thanks to its high-performance rechargeable battery motor. Flexibly 360 ° rotatable and easily adjustable by handset. Transfer processes into the pool are possible at floor level as well as in free-standing pools without any problems.

Seat optional
extendable to a
stretcher type seat.

Slings

Optimal fitting and correct application of the slings are crucial for patient comfort.

Transfer slings

- ✓ With headrest
- ✓ Padded leg loops
- ✓ High quality nylon material

Bathing slings

- ✓ With headrest
- ✓ Padded leg loops
- ✓ High quality nylon-mesh material

Toilet slings

- ✓ With headrest
- ✓ Padded leg loops
- ✓ Arm padding

Soft slings

- ✓ With headrest
- ✓ Padded leg loops
- ✓ Breathable nylon / cotton blend

Sit to stand slings

- ✓ Arm and back support with anti-slip coating
- ✓ Double safety straps for the chest area
- ✓ Additionally padded chest strap

High quality, durable materials.

Nylon-mesh material

Bathing slings

Nylon material

Transfer and sit to stand slings

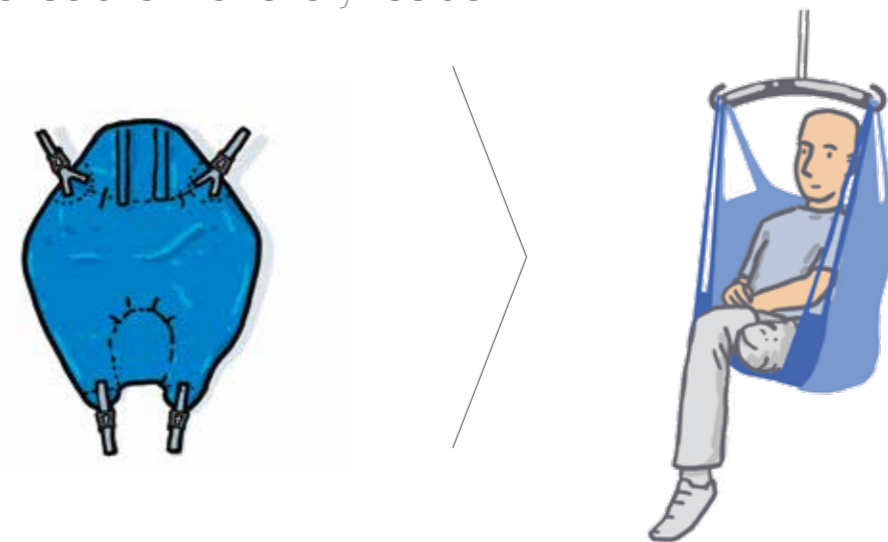

Nylon / cotton blend

Soft slings

Custom-made slings according to your needs!

An individual solution for every resident.

Individual solutions, such as for one- or bilateral leg amputee residents, we realize after an intensive exchange with you. Whether it is a special cut, or unusual materials - we always find the perfect solution!

Wide range of slings

All slings available:

- with clip or loop suspension
- in different sizes

Nursing- and care tables

Indispensable for care facilities. We develop our care tables to the highest standards of comfort for the patient as well as optimal usability by the caregiver.

MONA

Watch product video!

- ✓ Mobile and secure
- ✓ Stepless height adjustment
- ✓ Comfortable, soft and firm upholstery
- ✓ Different upholstery sizes available
- ✓ Easily accessible with care lifters

Optionally available as a battery operated version.

Mobile nursing- and care table. MONA offers a large work surface with comfortable padding and rounded edges for a safe and reliable basis in daily care. Thanks to its sturdy substructure and 4 steering wheels with brakes, the mobile care table can be effortlessly moved and securely positioned. Optionally, with an electric or hydraulic height adjustment an ergonomic working height is always ensured. Optional side rails provide additional security.

ANA

- ✓ No disturbing substructure
- ✓ Electrically height adjustable
- ✓ Various table sizes available
- ✓ Adaptable to customer requirements

ANA CTX

- Standard version usable as shower stretcher ✓
- Adjustable head part ✓
- Electrically height adjustable ✓
- Various table sizes available ✓
- Foldable by gas spring ✓

Optional with foldable table!

Nursing- and care table for wall mounting. The nursing table ANA does not require a substructure, thus reducing the risk of injury to children and adults. The comfortable cushion of the care table is completely moisture resistant and easy to disinfect. The nursing table upholstery is available in different sizes.

Usable as a shower stretcher and care table.

Nursing- and care table for wall or floor mounting. Thanks to the plastic tray with central drainage pipe, the ANA CTX can be used as a standard shower stretcher. It is optionally equipped with LED lighting and adjustable headboard and can be easily adjusted by cable remote control.

Our mobility groups

Starting from the Clinical Frailty Scale (CFS)17 and the Functional Independent Measure (FIM).

Group 1

Residents who are completely independent of the nursing staff with their activities of daily living.

Residents who can walk freely with mobility aids (rollator, zimmer frame, etc.) but who are spatially, physically and temporally restricted in mobility.

Group 2

Residents who can move independently using aids (rollators, wheelchairs). Movement over distances and time is very limited.

Group 3

Group 4

Residents who are mostly bedridden, with severely restricted mobility and who are not in a position to survive on their own.

Group 5

Residents who are completely bedridden. These are completely dependent on the nursing staff in all their activities of daily life and have a high mortality risk (life experience less than 6 months).

Valuable knowledge for planners, architects, nurses and decision makers.

Understandably summarized in our Mobility Guidebook!

Over 50 years of experience, intensive, international research and practical cooperation with industry specialists complete our Mobility Guidebook.

With our Mobility Guidebook you can classify your residents into mobility groups, select appropriate technical aids for the nursing staff and plan optimal working areas.

- ✓ Planning proposals for nursing rooms
- ✓ Detailed mobility group descriptions + product recommendations
- ✓ Application tips like sling attachment techniques

Planning proposal
